DETAILED ACTION

1. Claims 1-34 are pending in the application.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-31 and 34 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-30 are directed to preparing compounds of formula IC by using compounds of formula IC as a starting material. Therefore, it is not clear what is the difference between compounds of formula IC being used as a starting material and the compounds of formula IC formed in step (c). The actual intent of going through steps (a), (b) (c) and (d) is not clear if the compounds of starting material and the end product are same.

Claim 31 recites the limitation "trans isomer and cis isomer" in claim 1. There is insufficient antecedent basis for this limitation in the claim.

Claim 34 does not end with a period.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

6. Claims 32-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fukami (U.S. Patent 6,388,077).

Fukami discloses spiro compounds of formula VI-1 (see claim 1). In column 30, Fukami teaches that compounds of formula (VI-1) have two kinds of stereoisomers represented by formulae (VI-1-a) and (VI-1-b). Fukami meets all the limitations of instant claims except that Fukami does not teach percentages of trans isomer of formula (VI-1-a) and cis isomer of formula (VI-1-b). However, Fukami discloses compounds of formula (VI-1) in claim 1 which has both the isomers. Therefore, it would have been obvious to one skilled in the art to prepare composition of compounds of formula (VI-1) having both trans isomer and cis isomer unless applicants provide unexpected results of data showing different percentages of these two isomers as compared to these two isomers in the compounds of formula (VI-1) disclosed by Fukami.
